### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Stitzel on 11/3/2011.

The application has been amended as follows:

In claim 1, please remove [consisting essentially of vinylamine units].

Please cancel claims 7, 9 and 10.

### *Reasons for Allowance*

The following is an examiner's statement of reasons for allowance:

First, applicant's arguments in appeal brief regarding the 112 1<sup>st</sup> rejections are persuasive. The applicant's originally filed specification supports "after the treatment with the cationic polymer the treated paper or paper product is not coated." It should be noted that "coated" has been interpreted in the art of paper coating as provided by Ullmann's Encyclopedia of Industrial Chemistry, Fifth Edition (which was supplied by applicants). Support in the specification can be found at least at page 5, lines 14-25, where the treatment is applied to the top surface of the paper or after the final coat. Additionally, the examples disclose providing the treatment and no additional coating prior to printing of the paper, thus the paper is not coated (see Examples on

pages 8-12). Finally, it should be noted that applicant's specification alternatively provides for coating the paper product after the treatment with cationic polymer (see page 5, lines 14-19), therefore providing the basis for excluding additional coatings after the treatment with the cationic polymer. Note that it is well-settled premise of patent law that a negative limitation or exclusionary proviso explicitly excluding an element from a claim is permissible, especially when the element recited in the negative proviso is positively recited in the specification, as argued in applicant's appeal brief.

With regards to prior art, the closest prior art of record to claim 1 is Blum et al. (U.S. PGPUB No. 2004/0154764). Blum teaches a process comprising treating a paper with an aqueous solution comprising only a hydrolyzed homopolymer of N-vinylformamide, where the composition is applied in an amount of  $2 \text{ g/m}^2$ . Blum further teaches hydrolyzing the homopolymer to provide varying degrees of hydrolysis and imparting more or less cationic character to the polymer. Blum further teaches applying the coating by size press. However, Blum fails to teach or suggest the claimed charge density or degree of hydrolysis as is claimed, and fails to teach or suggest that these are result-effective variables, thereby failing to teach or suggest optimizing these parameters. Furthermore, Blum requires a coating step after the coating step with the cationic polymer, which has been excluded in applicant's claim. Therefore, claim 1 is patentable over the prior art of record. Claims 2-4, 6, 11-15, 17, 18 and 22-24 depend from claim 1, and are also allowable for the same reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

Claims 1-4, 6, 11-15, 17, 18 and 22-24 are allowed.
